Profile

Information System graduate looking to apply my knowledge of computer systems and technology and grow with the company. I have visions that I want to achieve that can be done through hardwork and when it comes to hard work I'm really a focused determined person and I can get anything done that I put my mind up to. I have a good record of doing things on time in an efficient manner. I am an optimist that doesn't give up easily till the goal that i set is reached. I would like to work in an environment that is rich in technology as it fascinates me and I would like to put my skill into it and try to work efficiently.
